

Are you sitting comfortably?

Relax. Take comfort in a Cosi Chair riser-recliner.

The ultimate in comfort, styling and technology

Many experts will tell you that sitting down is anything but relaxing. It is in fact a dynamic function – tiny movements in position allow us to correct discomfort and maintain our posture in response to how comfortable we are, what we are doing and what is going on around us. As we spend so much time seated – watching TV, reading, eating a meal, using a computer or telephone, or simply chatting – we should ensure that we are seated correctly with support in the right places.

Designed and built by specialists in the manufacture of riser-recliner chairs. Each Cosi Chair combines utmost comfort with total practicality and advanced styling providing all the support you need.

Cosi Chairs are specially designed to help if you suffer from medical conditions such as arthritis and rheumatism making sitting, reclining and standing up easier with a smooth lift, tilt and recline action.

Combining high quality and renowned attention to detail

- Traditional materials and craftsmanship combined with technologically advanced processes – all frames are constructed from kiln-dried hardwood
- Our single and dual-motor riser-recliners are smooth and quiet in movement – Okin motor industry quality
- Easy to use hand control for ultimate positioning at the touch of a button
- A battery back-up system to bring the chair to a seated position in the event of a power loss
- Our Smart Tek diagnostic system speeds up the time taken for any service support
- Lifetime warranty on the sub frame of the chair (excluding scissor mechanism)
- One-year warranty on all parts and labour

Environmental Policy

The kiln-dried hardwoods supplied in the manufacture of the Cosi Chairs come from properly managed forests. Best management practices are used for harvesting and re-planting to ensure future generations of growth. Timber harvesting policy considers the complete environmental impact on soil erosion, water quality, existing plant life and local wildlife.
