Mobility solutions for independent living

Growing, changing and learning... The choice of a child's wheelchair is always determined by the size of the child at that time. This will always be the case when you are looking for a suitable short term solution.

But what about the child's needs in the future?

With these thoughts in mind Excel has developed the Excel G5 Paediatric wheelchair that grows with the child.

This allows the child to use the same wheelchair for many years without the need for the costly investment in many different wheelchairs. The G5 Paediatric wheelchair is seat width, seat depth and seat height adjustable, meaning one wheelchair will last the child many years.

With:
- Adjustable nylon heel loops on the foot plates
- Depth and angle adjustable brakes

With:
- Heavy-duty aluminum cross brace
- Anti-tip system
- Height adjustable push handles
