

AutoGo

innovation without compromise

Sleek, modern and light weight, the AutoGo 550 is the unique new 4-wheeled scooter from Electric Mobility. With no bending or lifting necessary, the AutoGo 550 folds automatically in less than ten seconds – simply by pulling a lever – allowing quick and easy storage wherever you may be.

Its clean lines and slender framework belie the fact that the AutoGo 550 can carry up to 21 stone and disassemble quickly into four components – the heaviest being only 45lb – for transportation (see reverse for details). Available in red or blue.

Ask your Electric Mobility Euro dealer for a test drive – just promise to bring it back!

folds in just **ten** seconds simply by **pulling a lever**

Designed for practicality without compromising comfort, the AutoGo 550 can be transported wherever you want to go, whether by car, train or bus. It can even be used as an aid for walking.

With an integral headlight, solid aluminium frame, detachable battery pack, patented folding seat and digital controller for a smooth ride, the AutoGo 550 is the new benchmark for scooter users looking for a versatile and modern mode of transport.

Features and specifications

The AutoGo 550 can be disassembled in four easy stages for storage or transportation

Overall length	Overall width	Seat to floor height	Total weight	Max. user weight	Heaviest component	Batteries
107cm (42")	55cm (21.5")	52cm (20.5")	50kg (110lb)	136kg (300lb)	20.4kg (45lb)	2 x 12amp
Front wheel size	Rear wheel size	Turning radius	Battery pack weight	Maximum speed	Maximum range	Safe climbing angle
18x4.5cm (7x1.75")	23x7.6cm (9x3")	89cm (35")	9.5kg (21lb)	6.4kph (4mph)	16km (10 miles)*	12°

* Range is calculated under test conditions. Weight, terrain and weather conditions can affect range of travel
