and VSI controller

Equipped with our patent pending Mid-Wheel 6[®], the Jazzy[®] 610 delivers maximum stability without compromising performance. The independent active OMNI-Castors (nylon, spherical-shaped castors) raise and lower to compensate instantly for changes in the terrain and allow for smooth and stable transitions. The Jazzy 610 is the ultimate choice for users who demand maximum stability, tight manoeuvrability and all-around performance.

***Theoretical range is calculated under test conditions in accordance with European standards. Actual range in normal use will depend on many factors, including the condition of the vehicle and its batteries, the weight of the driver, correct tyre pressures, ambient temperature, and the gradient and surface of the road or pavement.

***Exact product configurations shown on this literature may not be available in all markets.
