

Yes, you can.[®]

➤ Invacare[®] Taurus

Move with style and power

The *Invacare[®] Taurus* scooter has been designed to provide all the power and performance of a larger scooter but in a more compact and transportable model. This small to medium sized scooter will take you on longer journeys in comfort and style.

➤ **Powerful**

The *Invacare*® **Taurus** is a highly manoeuvrable, mid-sized scooter, with plenty of power to negotiate rougher terrain. It has a category leading 450W motor that easily copes with a maximum user weight of 127 kg. The **Taurus** can climb a 10 cm kerb with no problem and will travel up to 20 miles on one charge.

➤ **Comfort for all**

With a highly adjustable seat position and angle adjustable tiller, the **Taurus** is very adaptable to suit most people. It also has a fully padded seat for optimum driving comfort.

➤ **Compact and Lightweight**

This medium sized scooter has all the performance of a larger scooter but is easily dismantled into compact components and can be transported in the boot of a standard car. There are a range of accessories available including front lockable basket, cane holder and scooter cover.

➤ **Safe and Simple to Operate**

The **Taurus** features easy to use controls for either left or right handed people; simply push the control bar forward and away you go. As soon as you release the bar, the scooter will stop immediately. It also has an added safety feature to slow the scooter's movement on a slope when the motors are disengaged.
