

Versa-Lite

Versa-Lite

The Versa-Lite ultra lightweight scooter gives you quick, easy transport in style and comfort.

Weighing in at just 69lb (31.5kg), Versa-Lite is probably the lightest scooter ever made, making it as easy as possible for you to lift into your car. Its simple construction means you can take it apart and reassemble it in literally seconds, so storage or transport are a breeze. It also features an easy-to-use split base.

Versa-Lite is strong and stable, with a weight capacity of up to 21st (136kg). Its state-of-the-art new design makes it big on legroom for such a small scooter, bringing comfort and enjoyment to every journey.

With alloy look wheels and metallic paintwork, Versa-Lite is stunningly attractive and stylish as well as practical.
